EDUCATION

University of Minnesota

Master of Science in Computer Science, GPA 3.7 / 4.0

Minneapolis, MN

May 2024

University of Minnesota

Bachelor of Science in Mathematics, GPA 3.7 / 4.0

Minneapolis, MN

May 2022

EXPERIENCE

Travelers Insurance

Associate Data Engineer

Saint Paul, MN

Jun 2025 – Present

- Built CI/CD pipelines with GitHub Actions and Docker to automate ML model deployment, cutting time-to-production by 50%
- Provisioned and maintained AWS infrastructure (Step Function, SageMaker, SNS) using Terraform, reducing environment provisioning time by 40% and improving deployment consistency
- Built REST APIs for 3+ underwriting models using Python and FastAPI, deployed on Kubernetes to support real-time and batch ingestion of 500K bytes/sec
- Developed and deployed building valuation services on AWS (Lambda, EKS, S3, EventBridge, ArgoCD), enabling automated processing of up to 10 GB/day

Data Engineer (Engineering Development Program)

Jun 2024 – Jun 2025

- Modernized Java Spring Boot application front-ends by migrating from ExtJS to vanilla JavaScript, achieving security compliance and eliminating 80% of critical Snyk vulnerabilities
- Led TDD efforts to implement and automate 200+ unit tests for 4+ Java Spring Boot applications, achieving 92% average code coverage and improving code reliability
- Built local testing environments for AWS Lambda functions using Flask and Postman, reducing debugging time and improving development iteration speed by 50%
- Founded and managed the EDP Disc Golf Club, coordinating monthly events for 30+ members and fostering peer engagement

University of Minnesota

Research Programmer

Minneapolis, MN

Oct 2022 – Jun 2023

- Optimized function parameters to improve the accuracy and correlation of experiment regression models by 10%
- Developed Python scripts to process, clean, and analyze 120+ CSV files, extracting relevant data to support experiments and accelerate analysis workflows
- Translated 3 legacy MATLAB scripts into Python code, improving project scalability and maintainability

PROJECTS

The Sock Exchange | *MongoDB, Express.js, React, Node.js, Python, Flask, Git*

- Developed a sock exchanging application that emulates the stock market using the MERN stack
- Implemented and trained a classification model on 1000+ socks to determine sock cleanliness based off various attributes
- Utilized Flask for endpoint connection between the MERN application and a server hosting of model results
- Automated the setup, installation of dependencies, configuration, and build with Git Actions

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, C, SQL

Cloud & DevOps: AWS (Lambda, S3, SageMaker), Terraform, Docker, Kubernetes, Jenkins, GitHub Actions, Kafka

Frameworks & Tools: Flask, REST APIs, Node.js, Express, Spring Boot

Databases & Storage: MongoDB, MySQL

CERTIFICATIONS

AWS Developer

AWS Cloud Practitioner
